SUMMARY

Computer Science and Engineering undergraduate at BRAC University and Generative AI Executive at UVTR InfoTech, where I produce AI-generated video ads for client brands including PRAN and build software with the development team. I build full-stack web apps (React, Node.js, PHP, MySQL), Android apps (Kotlin) and from-scratch security features. Seeking software engineering and AI internships and roles.

EXPERIENCE

Generative AI Executive *Aug 2026 – Present*

UVTR InfoTech Ltd. · Full-time · Dhaka, Bangladesh (Hybrid)

- Design AI models and characters with Higgsfield AI and ChatGPT, and turn them into video advertisements for client brands, including PRAN Ltd.
- Write and refine prompts for consistent characters, scenes and product shots across a campaign, from first concept to the final ad.
- Joined the development team building software products for clients; contributed to a WhatsApp bot, the team's most recent release.

Club President *Feb 2026 – Present*

IABC (International Association of Business Communicators), BRAC University · Dhaka

- Hosted Diplomat's Meet 2026, bringing together 160 participants.
- Run club operations, plan events and coordinate the executive team.
- Represent the club to the BRAC University student council.

PROJECTS

FixSquad: Home Services Marketplace | *React, Node.js, Express, MySQL* *Aug – Sep 2026*

- Multi-role marketplace for booking local service providers: search, booking, provider dashboards, messaging, automated invoicing, ratings and admin dispute resolution.
- Main contributor in a 4-person team over 4 Agile sprints; MVC architecture with raw SQL, JWT auth, rate limiting, and XSS and IDOR protection.
- Extended for the Cryptography course with engines written from scratch: ARX password hashing, TOTP 2FA, AES-256-GCM key management, RSA, ECC-style message masking and CBC-MAC. Code

EventNexus: Event Management System | *PHP, MySQL* *Jan 2026*

- Indoor event platform with admin, host and customer roles, automatic venue and time-clash detection, and auto-generated PDF tickets.
- Role-based access control, input validation and SQL injection protection (Database Systems course).

Cadence: Music Learning App | *Kotlin, Jetpack Compose (Android)* *Oct 2026 – Present*

- Music theory and ear-training app with guided lessons, a piano keyboard synced to real-time sheet notation, and an interactive Circle of Fifths.

Developer Portfolio (in progress) | *HTML, CSS, JavaScript* *Oct 2026 – Present*

- Terminal-style portfolio built in public with a daily log: command interface, git-style milestone timeline and filterable project grid, with no frameworks.

Other projects *2026*

- Habit Builder PWA (PHP): habit-tracking web app with accounts and a dashboard. · The Final Tackle (Python): a football-themed game. · 3D graphics work in Python and OpenGL.

EDUCATION

BRAC University, Dhaka *2023 – Present*

Bachelor of Science in Computer Science and Engineering

- Relevant coursework: Software Engineering, Cryptography, Database Systems, Computer Graphics, Data Structures, Algorithms

Mirzapur Cadet College, Tangail *2016 – 2022*
Higher Secondary School Certificate (HSC), Science

SKILLS

Programming: JavaScript, Python, Java, PHP, Kotlin, SQL, HTML5, CSS

Frameworks & Tools: React.js, Node.js, Express.js, Jetpack Compose, MySQL, REST APIs, Git, GitHub, OpenGL

Generative AI: Prompt Engineering, ChatGPT, Higgsfield AI, AI Video Generation, Chatbot Development

Engineering: Full-Stack Development, Android Development, Database Design, Cryptography & Information Security, Data Structures & Algorithms, Agile/Scrum

Design: Adobe Photoshop, Adobe Illustrator

Leadership: Event Management, Team Leadership, Club Operations

LANGUAGES

English (limited working proficiency) | **German** (elementary)
